## INFANT SWIMMING ACCELERATES COGNITIVE DEVELOPMENT

Australian Infant Swimming Research has demonstrated early participation in swim lessons can accelerate a child's cognitive development. Results have shown children under the age of five involved in swim lessons are more advanced in their cognitive and physical development than their non swimming peers. Additional benefits can be found with social and language development. Research also showed infants moving within water's constant resistance strengthens, children muscles more rapidly, than playing on the floor. This effect is due to more large muscle groups are engaged in swimming activities.

## SPIRIT SWIM TEAM

Spirit Swimming is a year-round competitive USA Swimming program serving the South Metro Twin Cities area. Located in Lakeville and affiliated with the Family Swim School, the Spirit Training philosophy, is a stroke technique based program.
