Example well drilling equipment

Electrical building

Wellhead pitless adapter with protective covering

Wellhead pitless adapter with cover removed

Project Description

The City of Lakeville, in conjunction with Barr Engineering, plans to add Well 23 to its water supply system to meet existing and future water demands. The well is proposed to sit between Iden Avenue and Impala Avenue off 190th St. W.

Project Objectives

Construct Lakeville Well 23 to meet existing and future water demands.

Provide safe and efficient drilling of Well 23.

Engage the public to ensure Well 23 fits seamlessly into your neighborhood and expectations and values are met.

Project Timeline

Construction is expected to occur in early 2024.
