14630 Hwy 65
Ham Lake, MN 55304
763-434-0449
'Killzall'
'Aquatic Killzall'

Minnesota Valley Garden Center

3232 W 150th St
Shakopee, MN 55379
952-445-9160
'Killzall' Pint – 14.99 / Quart – 26.99

Otten Bros Nursery & Landscape

PO BOX 249
Long Lake, MN 55356
952-473-5425
'Killzall' 16oz – 12.95 / 24oz RTU

The Tree House

12369 Point Douglas
Hastings, MN 55033
651-437-7625
'Killzall' Quart – 21.95
'Aquatic Killzall' Quart – 32.95

UAP / Timberland / Verticon

4821 Xerxes Avenue N.
Minneapolis, MN
763-535-1030
'Roundup Pro' (2.5 gal) – 145.00
'Cleanup Pro' (2.5 gal) - 105.62 (35.00/gal)
'Rodeo' (2.5 gal) – 215.90
'AquaNeat' (2.5 gal) – 86.19 (28.54/gal)

Note: For use near the water's edge, *'Aquatic Killzall'* & *'AquaNeat'* are similar in formulation to Monsanto's *'Rodeo'* Aquatic Herbicide. No local sources of quart-sized *'Rodeo'* were found in the metro area during our research. (2.5 gallons seems to be the minimum size for *'Rodeo'* that is available locally).

Note: For use out of drift-range from the water's edge (5-10' away), *'Killzall'* & *'Cleanup Pro'* are similar in formulation to Monsanto's *'Roundup'* Herbicide. There are also other brands of generic glyphosate-based herbicides. Look on the label to make sure that "glyphosate" is the active ingredient. Try to get the concentrate form, rather than the Ready-to-Use (RTU) which is usually too watered-down.

Note: A permit is required from the DNR-Division of Fisheries for application of herbicide below the Ordinary High Water Mark (OHW) on wetlands, lakes & streams. Contact: 651-772-7956 (talk with Neil)

Inclusion on this list does not imply any endorsement or recommendation of a specific business or service. To be included on this list contact the Anoka Conservation District.

General Herbicide Application Instructions

Herbicide application info:

For use near the water's edge, use Monsanto's 'Rodeo' Aquatic Herbicide (or equivalent) - 41% Active Ingredient. For use out of drift-range from the water's edge (8-10' away), use Monsanto's 'Roundup-Pro' Herbicide (or equivalent) - 41% Active Ingredient.

For low-volume hand-held sprayers, recommend a 5-10% solution (6.5 - 13 ounces of herbicide per gallon of water). Spray coverage should be uniform with at least 50 percent of the foliage contacted. Coverage of the top one-half of the plant is important for best results.

Herbicide should be applied twice. After 1st spraying, wait two weeks then spray any remaining live undesirable vegetation. After final spraying, wait one week before planting live plants.

Consult manufacturer's Material Safety Data Sheet for more information.

Note: A permit is required from the DNR-Division of Fisheries for application of herbicide below the Ordinary High Water Mark (OHW) on wetlands, lakes & streams. Contact: 651-772-7956 (talk with Neil).

Inclusion on this list does not imply any endorsement or recommendation of a specific business or service. To be included on this list contact the Anoka Conservation District.
